-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Information Disclosure Statement***

a. The information disclosure statement filed 9/15/04 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claim 16 is rejected under 35 U.S.C. 102(e) as being anticipated by Yoshikawa et al. (US 6,125,041, newly cited, hereinafter, Yoshikawa.)

In regard to claims 16, in fig. 15, Yoshikawa discloses an information card comprising:

a conductive external panel 24 having a ground member disposed therein (note, panel 24 is metal panel; therefore, it functions as a ground element);  
a circuit substrate 50; and  
a seat member 25 disposed on the circuit substrate protruding in the direction substantially perpendicular to a substrate of the circuit substrate.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 17 is rejected under 35 U.S.C. 103(a) as being unpatentable over Yoshikawa as applied to claim 16 above, and further in view of Young et al. (US 5,596,486, previously cited, hereinafter, Young.)

In regard to claim 17 Yoshikawa discloses all of the claimed limitations as mentioned above but does not expressly mention the panel being made of stainless steel. It should be noted that stainless steel material is widely used in this area since it protect the device from erosion and oxidation and it is also weldable. For instance,

Art Unit: 2814

Young discloses an analogous device includes a card with the cover or frame made of weldable material stainless steel; see col. 4, lines 50-55.

Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention was made to use weldable material as taught by Young in order to obtain advantages mentioned above.

#### ***Allowable Subject Matter***

5. Claims 1-15 are allowed.

#### ***Response to Arguments***

6. Applicant's arguments with respect to claims 16-17 have been considered but are moot in view of the new ground(s) of rejection.

#### ***Conclusion***
